Lawrence Wu

St John's College, St John's Street, Cambridge CB2 1TP

📞 (+44)7955105921　　•　　✉ shw43@cam.ac.uk

Education

University of Cambridge *MSc Physics*　　　　　　　　　　　　　　　*Oct.2022–Jun.2023*
- Thesis: Calabi-Yau Metric Approximations using Graph Neural Networks
- Quantum Field Theory, Advanced Statistical Physics

University of Cambridge *BA(Hons) Physics, 1st class*　　　　　　　　*Oct.2019–Jun.2022*
- Scored over 90% in 2/4 final year core modules (General Relativity, Electrodynamics)
- Computing Project: Simulation of the Ising Model of Ferromagnetism
- Literature Review: Development of Quantum Computing Hardware

Relevant Modules: Statistical Physics, Advanced Quantum Mechanics, Particle Physics,
Linear Algebra, PDE, Complex Analysis, Group Theory, Rep Theory, Differential Geometry

West London Free School (UK) *Sixth Form*　　　　　　　　　　　　*Oct.2017–Jun.2019*
- A-Levels (All A*s): Physics, Maths, Further Maths, Chemistry.

Taipei Municipal Jianguo High School (Taiwan) *High School*　　　*Sept.2016–Oct.2017*
- Ranked 1st in entrance exam for the governmental Gifted Class of Mathematics and Science.

Awards

- United Steel Companies Scholarship, St John's College, University of Cambridge (2020, 2022)
- Top Gold, British Physics Olympiad (2019)
- Distinctions, British Mathematics Olympiad (2018 & 2019)

Publication

Investigation of Cosmic Preferred Directions in the Cosmic Microwave Background Using New Strategies, Lawrence Wu & Jiun-Huei Proty Wu (in preparation).

Research Experience/Projects

Calabi-Yau Metric Approximations using Graph Neural Networks　　*Oct.2022–May.2023*
Supervisor: Prof. Pietro Lio, Computer Laboratory, University of Cambridge.
- Deducing numerical Ricci flat metrics for different C-Y manifolds through GNNs by manifold graph discretisation

Preferred Directions in the Cosmic Microwave Background (CMB)　　*Aug.2021–present*
Supervisor: Prof. Jiun-Huei Proty Wu, Department of Physics, National Taiwan University.
- Independently developed the codebase, which analyses data with over 50 million pixels each
- Applied new strategies to investigate possible preferred axes or directions in the observed full-sky

CMB maps.

Efficient Wordle Solver based on a Complete Graph $\hfill$ *Feb. 2022*

Independent research on Interesting Problems

○ A rapid brute force solver in python based on the complete directed graph of all 6000 5-letter words
○ The directed graph was simplified into a simple graph by applying a non-trivial symmetry between the edges
○ Concluded the best strategy of starting with "Aloes" with an expected guess count of 3.2 guesses

Simulation of the Ising Model $\hfill$ *Oct.2021–Apr.2022*

Undergraduate Computational Project.

○ Implemented and Investigated the Ising Model using Monte-Carlo optimisation algorithms.

Simulation of the domestic and international spreading of COVID-19 $\hfill$ *Mar.–Jun.2020*

Independent research on Models building.

○ Simulated the spreading by modelling individuals as repulsive particles.
○ Investigated how the spreading rate varies with the strictness of quarantining, travel restriction and social distancing
○ Determined how the rate of spreading varies with the vaccination rate.

Connect Four AI $\hfill$ *Jun.–Aug.2018*

Independent research on Machine Learning.

○ A Connect4 agent based on Monte Carlo Tree Search (MCTS).

Work Experience

University Surf Society *Trip Secretary* $\hfill$ *Jun.2022–Present*

○ Idependently organised a 50-people surf trip to Morocco with a $20k budget.
○ Currently working on another 50-people trip to the Canary Islands.

Physics Olympiad Tutor *Tutoring* $\hfill$ *Jun.2022–Present*

○ Tutoring for the preparation of IPhO, BPhO and other advanced physics competition.

M2 Digital Asset Management *Summer Intern* $\hfill$ *Jun.–Jul.2021*

Project: Research and Development of Bitcoin Pricing Models.

○ Estimated the average mining cost per coin from historical mining difficulty and ASIC chip efficiency data.
○ Developed codes to estimate the probability distribution of future BTC prices by using current option prices.

Programming/Computers

Python (Numpy, Scipy, Scikit, Tensorflow, PyTorch), C++, LaTeX, Linux

Hobbies

Poker, Surfing, Skateboarding, Speed Cubing, DJing(House)
